

## Baterías para portátiles Apple

### Características principales

- Alta capacidad con tiempos iguales o superiores en comparación a la batería original
- stand-by largo tiempo (baja auto-descarga)
- Protección de sobrecarga
- Alta estabilidad
- 100% compatible con la batería original
- Ajuste perfecto y apariencia

#### Método de instalación de baterías

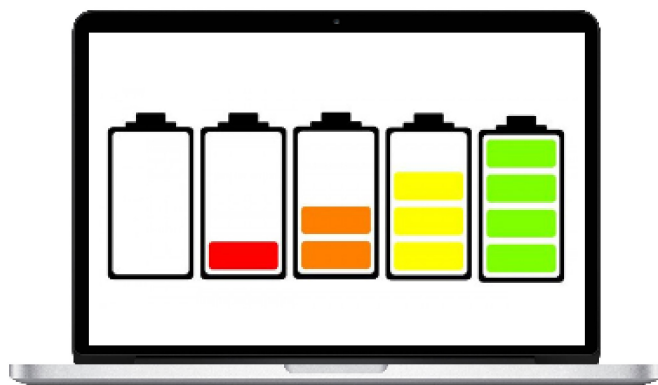

- \*1) Batería fuera del ordenador, instalación directa sin necesidad de herramientas
- \*\*1) La batería está dentro del equipo (built-in); requiere un equipo especial para su instalación (no incluido). Instalación recomendada por un técnico
- \*\*\*1) Batería dentro del equipo y además pegada (built-in, glued), requiere un equipo especial para su instalación (no incluido). Instalación recomendada por un técnico

#### Recomendación para la calibración de la batería:

Después de un cambio de batería, se recomienda calibrar el nivel de carga de la batería desde el OS X y luego dejar que el ordenador funcione hasta que la batería se agote por completo (y el Mac se apague). Luego recargar completamente la batería y empezar a trabajar normalmente con su computadora. La información del nivel de batería ahora debe ser precisa otra vez..
